

Fortunate Hub: Digital Transformation

Phase 1: MVP & Core Commerce

Project Overview

The Minimum Viable Product (MVP) aims to establish Fortunate Hub's digital presence and enable secure, localized online transactions.

Core Features

- **Mobile-Friendly Website:** A fully responsive interface featuring the menu and current pricing.
- **Cart & Checkout:** Seamless system for users to select items and proceed to purchase.
- **Payment Integration:** Secure integration with Paystack or Flutterwave.
- **Basic Admin Panel:** Essential interface for staff to view and update order statuses.

Technical Strategy & Suggestions

- **Frontend Excellence:** Leverage Next.js with Tailwind CSS to achieve the mobile-first requirement with optimized performance.
- **Trust & Security:** Use official SDKs for payment gateways to ensure PCI compliance and build customer trust.
- **Visual Momentum:** Prioritize high-quality imagery of the digital menu to secure early stakeholder engagement.
