

Fortunate Hub: Digital Transformation

Phase 2: Operations & Management

Project Overview

Phase 2 focuses on internal efficiency, transitioning the platform from a storefront into a comprehensive business management tool.

Core Features

- **Order Tracking:** Real-time monitoring from placement to fulfillment.
- **Customer Accounts:** Profiles storing order history and preferences.
- **Sales Dashboard:** Reporting tools for data-driven business decisions.
- **Role-Based Access:** Secure staff logins with defined permission levels.

Technical Strategy & Suggestions

- **Real-time Architecture:** Implement WebSockets or Firebase Realtime Database for instant order notifications.
- **Operational UX:** Design the admin interface specifically for mobile/tablet use to fit the active workflow of hub staff.
- **Data Integrity:** Use a relational database like PostgreSQL to ensure robust sales reporting and inventory accuracy.
