

Fortunate Hub: Digital Transformation

Phase 4: Ecosystem Expansion

Project Overview

The final phase integrates specialized services like the Gym and Lounge while preparing the infrastructure for multi-branch scaling.

Core Features

- **Gym Membership:** Tracking, billing, and renewal system.
- **Lounge Reservations:** Digital booking for tables and spaces.
- **Event Booking:** Scheduling and ticketing for special events.
- **Multi-branch Scalability:** Centralized management for multiple locations.

Technical Strategy & Suggestions

- **Modular Design:** Treat Gym and Lounge as separate modules to allow for independent deployment.
- **Scalable Schema:** Ensure all database tables include location identifiers (e.g., `branch_id`) from the start.
- **Infrastructure:** Consider containerization (Docker) to make deploying to new branches consistent and fast.
